## **EXAMINER'S AMENDMENT**

### ***Examiner's Amendment***

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
2. Authorization for this examiner's amendment was given in a telephone interview with David Heath on January 18, 2006.
3. The application has been amended as follows:
  - Claims 41-56 cancelled.

### ***Reasons for Allowance***

4. The following is an examiner's statement of reasons for allowance: As the claims were read and interpreted in light of the specification, the prior art of record fails to specifically disclose a thin film transistor (TFT) array comprising, in particular, a second insulating layer formed on the TFT having a dielectric about 4.0 or less and formed with an a-Si:C:O or a-Si:O:F layer and where the layer has a first contact hole exposing a predetermined electrode of the TFT. Although Gu (U.S. Patent No. 6,376,270) teaches a similar structure, the reference fails to specifically disclose a second insulating layer

Art Unit: 2871

formed on the TFT with an a-Si:C:O or a-Si:O:F layer. While Murakami (U.S. Patent No. 5,053,844) does teach an insulating layer formed with an a-Si:C:O or a-Si:O:F layer, it does not teach such a layer on a TFT but rather a photosensor with a marked different intended purpose and advantages than that of Applicant's second insulating layer, thereby not rendering the combination as obvious (see Applicant's Arguments present in Pre-Appeal Brief Request filed November 23, 2005). Murakami's a-Si:O:F insulating layer is used to reduce band-gap while Applicant's layer is used to reduce or minimize parasitic capacitance between the first pixel electrode and the second signal line. Since the elements are of different technical fields and have no common intended purpose or advantages, no exists no obviousness motivation. Thus, allowance is proper.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
